## WORK EXPERIENCE

**Data Engineer of Web Analytics**, Scholastic Corporation, New York, NY, May 2016 to March 2018

- Wrote JavaScript to tag multiple web applications with Adobe Analytics (Omniure).
- Built and use data layers and utilized best practices for scraping data from page.
- Created A/B tests and implemented templates in Adobe Target.
- Test Android/iOS applications and monitor traffic to ensure correct tagging.

**Front End Developer**, Complex Media, New York, NY, Jul. 2015 to Feb. 2016

- Created and added buttons, arrows, and visual elements to ntrsctn.com and theridechannel.com.
- Utilized BEM CSS conventions and mixins, classes, and other SASS elements in stylesheets.
- Updated site logic and templates in Laravel.
- Re-forked and customized Angular packages and added them to current sites.

**Front End Developer**, Atto Consulting, New York, NY, March 2015 to May 2015

- Wrote front-end code for a Django-based app to meet Section 508 compliance.
- Optimized code and implemented new features in WordPress site.
- Rewrote user interface to fix tabbing and keyboard access for sight-impaired users.
- Wrote model logic in Rails application and deployed to Heroku.

**JavaScript Developer**, Ginkgotree, Detroit, MI, Jul. 2014 to Jan. 2015

- Coded and tested new templates, features, and third-party APIs for ginkgotree.com.
- Added new endpoints to suit new features and data from front-end.
- Wrote Ruby code to query database for sales team tool.
- Wrote company wikis for development setup, Lineman integration, and local SSL configuration.

**Web Developer**, Boydell Development, Inc., Detroit, MI, Nov. 2013 to Jul. 2014

- Led marketing team of designers to create websites for bars, restaurants, and apartments.
- Developed responsive sites featuring flat, functional designs and CSS3 animations.
- Integrated current websites into WordPress.
- Set up internal file server for marketing department to store graphics, videos, and photos.
